## EXPERIENCE

### **Cloud + AI Security Intern – Microsoft.** Redmond, WA (06/2019-09/2019)

Developed a security risk analyzing software using Python, Cypher, Neo4J, Azure Services, and JSON files. Worked directly with CVP of Cloud + AI Security Engineering team to establish stakeholder requirements for the software and present the final project.

- Engaged 8 other interns on smaller projects throughout the internship.

### **Founder – Greeto LLC.** Redmond, WA (10/2018-Present)

Independently founded an innovative greeting card company. Created the full stack for the website using HTML, CSS, PHP, and SQL. Established channels of distribution for both online and retail locations.

- Raised over \$6,000 through crowdfunding campaigns and individual investors.

### **Chapter President – DECA Inc.** Redmond, WA (06/2018-Present)

Maintained communication between advisors, executives, and the school board to help facilitate a Blood Drive hosted by BloodWorks. Crafted presentations to help prepare members and board for the competition season.

- Managed a board of 10 executives and 200 regular members.

### **Independent Creator – Kickstarter.** Redmond, WA (09/2017-04/2019)

Created 10 technology-oriented projects raising over \$14,000 total funding. Worked directly with manufacturers to ship products worldwide to 500 customers in 12 countries.

- Retained 40% returning backers from campaign to campaign through customer-oriented support.

## PROJECTS

### **Personal Website – <https://paulboldyrev.me>.** Redmond, WA (03/2020-04/2020)

Created a dynamic HTML/CSS/JS website after completing a web developer bootcamp course. Used Git + GitHub for deployment and development.

### **Twitter Bot – @MuskMood.** Redmond, WA (07/2019-09/2019)

Created a Twitter bot using Python, Twitter API, and Azure resources. The bot used machine learning to analyze sentiment of Elon Musk's Tweets and then post about his mood.
